Comparison of Options for a Map of Community Networks

Goals

- Visualisation of the extent of the CN movement around the world
- Identify countries/regions/localities which are 'hotspots' for CNs, and where the 'blanks' are...
- Identify where there are active meso orgs that CNs can go to for support
- The different technologies used
- The spread of CNs over time (assuming time was a variable included in the mapping mechanism

Options

Build on Cocomap by Article19

Source: [Cocomap](#) Pros:

- Open Source

Cons:

Adapt Libertura map for CRs to CNs

Source: [Liberatura Map](#) Pros:

- Open Source

Cons:

MapSVG and Wordpress

Source: [MapSVG](#) Pros:

Cons:

- Not Open Source

Discourse with Location Plugin

Source: Discourse and Location Plugin

Pros:

- Open Source

Cons:

Adapt Guifinet or Ninux maps to CNs more generally

Source: Guifinet Ninux

Pros:

- Open Source

Cons:
